

NGUYEN KHANH HOA

QA ENGINEER | MANUAL & AUTOMATION TESTING

Phone: +84 923 692 870 | Email: nguyenkhanhhoa1592@outlook.com | LinkedIn: [linkedin.com/in/nguyenkhanhhoa02](https://www.linkedin.com/in/nguyenkhanhhoa02) |

Location: Tan Binh District, HCMC, Vietnam

PROFESSIONAL SUMMARY

QA Engineer with over 2 years of hands-on experience in software quality assurance, covering both **manual** and **automation testing** for complex web applications and e-commerce platforms. Background also includes a stint in frontend development, which helps in spotting UI issues early and understanding how the product is actually built under the hood.

Comfortable designing test strategies, building automation frameworks from the ground up, and wiring testing into CI/CD pipelines in Agile/Scrum teams. Main automation stack is **Java** (Selenium WebDriver, TestNG, POM), with working knowledge of **JavaScript/TypeScript** and **ReactJS** that supports Shift-Left testing. Also experienced in API testing, performance testing with **JMeter**, and newer tools like **Playwright** and **Python**. Works closely with development teams to close the gap between dev and QA, aiming for reliable releases and a consistent user experience.

TECHNICAL COMPETENCIES

Testing Methodologies	Manual & Automated Testing, Shift-Left Testing, Regression, Exploratory, Smoke/Sanity Testing, Test Strategy & Planning
Automation & Frameworks	Selenium WebDriver , Playwright (TypeScript/JS), TestNG , Page Object Model (POM), Data-Driven Testing
AI-Assisted Testing	Uses AI tools to help generate, refine, and maintain test cases
Programming	Java (OOP, Core Java for Test Automation) – Proficient; JavaScript/TypeScript , HTML/CSS – Proficient; Python (Scripting & Data processing), SQL (Data validation) – Familiar/Applied
API & Performance	Postman (Collections, environment variables, automated assertions); Apache JMeter (Thread Groups, Assertions, throughput & bottleneck analysis)
Databases	MySQL, PostgreSQL, SQL Server – Familiar/Applied
Tools & Version Control	Git / GitHub ; Jira , Confluence
Methodologies & CI/CD	Agile/Scrum, SDLC/STLC, Defect Lifecycle Management, Root Cause Analysis, CI/CD Integration via GitHub Actions

WORK EXPERIENCE

AGEST VIETNAM

06/2024 - Present

QA Engineer (Manual & Automation)

Ho Chi Minh City, Vietnam

- Owns the end-to-end testing process for enterprise web applications, working closely with POs and developers to refine acceptance criteria and catch defects early (Shift-Left).
- Built and maintains a UI automation framework in Java using Selenium WebDriver and TestNG, structured around the Page Object Model (POM).
- Integrated the automated regression suite into GitHub Actions, cutting manual regression time by roughly 65% and giving the dev team faster feedback on each change.
- Writes and maintains API test scripts in Postman to check business logic separately from the UI.
- Runs performance and load testing with Apache JMeter, which has helped catch memory leaks and slow DB queries under loads of 500+ concurrent users.
- Mentors junior testers and interns on Agile processes, test case design, and basic Java automation.
- Delivered two client projects during this role - Safe Railway and the Omnichannel E-Commerce Platform, detailed under Featured Projects below.

NAM PHUONG DIGITAL TECHNOLOGY

12/2023 - 05/2024

Frontend Developer Intern (ReactJS)

Ho Chi Minh City, Vietnam

- Developed responsive UI components using ReactJS, HTML5, and CSS3, and picked up a practical understanding of frontend architecture and common UI defect patterns along the way.
- Took part in debugging and testing, fixing cross-browser compatibility issues that helped reduce UI-related bugs by around 20% before QA handover.
- Built a working knowledge of DOM structure, RESTful APIs, and browser developer tools (Network, Console, Elements) - skills that carried over directly into UI automation and root cause analysis later on.
- Worked with backend developers on API integration, which strengthened understanding of request/response flows relevant to API testing.

• FEATURED PROJECTS

Safe Railway - Enterprise Ticketing & Logistics System

06/2024 - 02/2025

Focus: Test Automation & Performance Testing

Client project delivered as part of the QA Engineer role at AGEST Vietnam

Tech Stack:

Java

Selenium

TestNG

Apache JMeter

GitHub Actions

MySQL

A high-traffic railway management and booking system serving 5,000+ daily active users, with dynamic pricing, real-time seat mapping, and integrated payment gateways.

- Put together a test strategy covering functional, integration, and performance layers.
- Built an automated regression suite from scratch (Selenium + Java) covering 100+ user paths, including search, reservation, and mock payment flows.
- Set up GitHub Actions to trigger automated tests on every deployment to staging.
- Configured JMeter load tests to simulate holiday-season traffic spikes (1,000+ requests/sec) and worked with backend devs to bring the booking API's response time down from 3.5s to under 1.2s.

Omnichannel E-Commerce Platform

03/2025 - Present

Focus: Test Automation & API Testing

Client project delivered as part of the QA Engineer role at AGEST Vietnam

Tech Stack:

Playwright (TypeScript)

Postman

Python

Jira

A scalable omnichannel e-commerce platform supporting 5,000+ SKUs across three sales channels (web, mobile, POS), with real-time inventory management, cart workflows, and multiple third-party logistics integrations.

- Piloted UI automation with Playwright and TypeScript, which improved test execution speed over the team's legacy scripts.
- Handles API testing through Postman to check inventory sync between web and mobile.
- Uses Python scripts to generate mock test data for edge cases, such as flash sales and negative-inventory scenarios.
- Runs exploratory and boundary value testing to support a reliable checkout flow, helping keep the post-release defect rate low.

• EDUCATION & CERTIFICATIONS

TON DUC THANG UNIVERSITY – Bachelor of Software Engineering | GPA: 7.61 / 10

- Certification: Agile Development & Scrum Framework Professional (10/2023)
- English Language: Aptis ESOL B1 (03/2024)
