

NGUYEN KHANH HOA

SOFTWARE TESTER | MANUAL & AUTOMATION TESTING

Phone: +84 923 692 870 | Email: nguyenkhanhhoa1592@outlook.com | LinkedIn: [linkedin.com/in/nguyenkhanhhoa02](https://www.linkedin.com/in/nguyenkhanhhoa02) |
GitHub: github.com/NguyenKhanhHoa6235 | Location: Tan Binh District, HCMC, Vietnam

PROFESSIONAL SUMMARY

Software Tester with close to a year of internship experience spanning **frontend development** and **software testing** for web applications, built entirely inside Agile teams. Comfortable getting into requirements early, designing test cases that catch real issues rather than just checking boxes, and staying close to developers as defects get tracked down and resolved through to regression.

Programming background in **Java**, applied to automation with **Selenium WebDriver** and **TestNG** under the **Page Object Model** for long-term maintainability, plus working knowledge of **JavaScript/TypeScript** and basic **Python**. Continues building on automation, performance testing, API testing, and CI/CD through active self-study outside of day-to-day work.

TECHNICAL COMPETENCIES

Automation Testing	Selenium WebDriver (Java) , TestNG framework, Page Object Model (POM) pattern, automation regression execution. Uses AI tools to draft and refine test cases
Programming Base	Java (good working knowledge - OOP fundamentals, applied to test automation), JavaScript / TypeScript (working knowledge - DOM manipulation), Python (basic scripting). Building on: Playwright , Hybrid/Data-Driven Java frameworks
Manual & Performance	Requirement Analysis, Test Planning & Case Design, Test Design Techniques (Boundary Value Analysis, Equivalence Partitioning), Defect Reporting & Verification, Functional / Smoke / Sanity / Regression / Exploratory testing. Entry-level load & stress testing with Apache JMeter
API & Databases	Postman (fundamental API verification), MySQL / PostgreSQL / SQL Server (basic SQL queries for data verification)
Tools & Version Control	Jira (issue & bug tracking), Git / GitHub (version control)
Methodologies & CI/CD	Agile Scrum, SDLC / STLC, entry-level CI/CD setup via GitHub Actions - applied hands-on in personal practice projects

WORK EXPERIENCE

AGEST VIETNAM

Software Tester Intern

12/2025 - 06/2026

Ho Chi Minh City, Vietnam

- Sat in on requirement analysis sessions with QA and dev teams, then wrote test cases and prepared test data directly from functional requirements and user stories.
- Executed manual test cases across web application features before each release, logging and tracking defects in **Jira** through to developer fix and regression re-test.
- Automation & Performance:** Maintained the team's Selenium/Java scripts under the Page Object Model, ran automated regression suites, and used JMeter for basic load testing to catch performance bottlenecks early.
- Joined regular Agile ceremonies - sprint planning, daily stand-ups, sprint reviews.

NAM PHUONG DIGITAL TECHNOLOGY

Frontend Developer Intern (ReactJS)

05/2025 - 10/2025

Ho Chi Minh City, Vietnam

- Built responsive UI components with **ReactJS**, **HTML5**, and **CSS3**, and connected frontend features to RESTful APIs using JavaScript/TypeScript.
- Tracked down and fixed UI bugs, including cross-browser compatibility issues, working alongside backend developers throughout feature development.
- Took part in testing, debugging, and client-side performance tuning before each deployment - the experience that first pulled focus toward QA, and gave a solid feel for SDLC.

FEATURED PROJECTS

Safe Railway - Railway Ticket Booking System

Automation & Performance QA Intern

12/2025 - 02/2026

Team Size: 7 | AGEST Internship

Tech Stack: **Java** **Selenium WebDriver** **TestNG** **Apache JMeter** **Git / GitHub**

Code Repository: github.com/NguyenKhanhHoa6235/Selenium-Agest-NguyenKhanhHoa-AGTT26.01.003

- Wrote Selenium/Java scripts covering the core booking flow - login, search, booking - structured with the Page Object Model for maintainability.
- Ran automated regression tests with TestNG, and set up JMeter load tests to check page response under high-volume booking simulation.
- Outcome:** Cut down manual regression effort by automating core flows, and caught a real response-time bottleneck in the checkout API under multi-user load.

Clothes Shop - E-Commerce Website

Manual Tester Intern

03/2026 - 06/2026

Team Size: 7 | AGEST Internship

Activities: **Requirement Analysis** **Test Case Design** **Manual / Exploratory / Regression Testing** **Bug Reporting via Jira**

- Turned user stories into test cases covering cart management and checkout, plus exploratory testing to poke at edge cases.
- Reported bugs with enough detail for quick reproduction, re-verified fixes through regression, and joined test review sessions with the team.
- Outcome:** Improved coverage on the flows that mattered most, caught several critical/high-severity bugs before release, and helped stability across browsers.

KEY STRENGTHS

- Genuinely curious about the "why" behind a bug, not just the "what" - strong analytical thinking, detail-oriented on functional and performance evaluation.
- Picks up new tools and stacks quickly, comfortable being the newest person on unfamiliar tech.
- Works well in Agile teams, communicates clearly with both QA and developers, and cares about product quality over just checking test cases off a list.
- Comfortable reading technical documentation and communicating in English.

EDUCATION & CERTIFICATIONS

TON DUC THANG UNIVERSITY - Bachelor of Software Engineering | GPA: 7.61 / 10 | Graduated: 04/2026

- Certification: **Agile Development & Scrum Framework** (10/2023)
- English Language: **Aptis ESOL B1** (03/2024) - intermediate speaking, strong reading & listening comprehension, comfortable with technical documentation
