

NGUYEN KHANH HOA

AUTOMATION TESTER / QA ENGINEER

Phone: 0923692870

Email: nguyenkhanhhoa1592@outlook.com

LinkedIn: [linkedin.com/in/nguyenkhanhhoa02](https://www.linkedin.com/in/nguyenkhanhhoa02)

Location: Tan Binh District, HCMC, Vietnam

PROFESSIONAL SUMMARY

Detail-oriented and highly adaptive **Software Tester** with foundational hands-on internship experience in both **Manual Testing** and **Automation Testing** within Agile Scrum environments. Possesses a strong object-oriented programming background in **Java**, successfully applied to constructing and scaling automation test scripts using **Selenium WebDriver** and **TestNG** under the Page Object Model (POM) architecture.

Backed by a solid background as a **Frontend Developer Intern (ReactJS)**, bringing comprehensive web expertise, deep familiarity with DOM trees, and browser developer tools to effectively debug client-side anomalies. Actively expanding scripting competencies in **Python**, API verification, and CI/CD pipelines to perfectly align with modern, high-quality automated testing expectations.

TECHNICAL COMPETENCIES

Automation Testing	Selenium WebDriver (Java) , TestNG framework, Page Object Model (POM) pattern, Regression automation suite deployment
Programming Base	Java (Strong core syntax & OOP principles), JavaScript / TypeScript (Web mechanics & application flow), Python (Basic scripting & syntax self-learning)
Web Technologies	HTML5 , CSS3 , ReactJS , Browser Developer Tools (DOM Inspection, network analysis, client console logs for debugging)
Manual & Performance	Requirement Analysis, Test Case Design, Defect Logging, Functional/Smoke/Regression testing. Basic load and stress execution via Apache JMeter
Tools & Databases	Jira (Issue & bug management), Git / GitHub (Version control), Postman (API verification), MySQL / PostgreSQL / SQL Server (Data verification queries)
Methodologies & CI/CD	Agile Scrum, SDLC / STLC processes, fundamental awareness of GitHub Actions workflows

WORK EXPERIENCE

AGEST VIETNAM

12/2025 – 06/2026

Software Tester Intern

Ho Chi Minh City, Vietnam

- Analyzed detailed product specifications and user stories to map out comprehensive test cases and prepare testing data environments.
- Executed cross-browser functional, regression, smoke, and exploratory testing on core web modules.
- Identified, recorded, and monitored software bugs transparently inside **Jira**, collaborating directly with engineers to review and verify resolutions.
- Automation Support:** Contributed to script creation and test script upkeep with **Selenium WebDriver (Java)** using the **Page Object Model (POM)** framework to improve coverage.
- Engaged actively in full Agile/Scrum lifecycles, joining Sprint Planning, Daily Stand-ups, and post-sprint reviews.

NAM PHUONG DIGITAL TECHNOLOGY

05/2025 – 10/2025

Frontend Developer Intern (ReactJS)

Ho Chi Minh City, Vietnam

- Assembled dynamic, clean web interfaces utilizing **ReactJS**, **HTML5**, and **CSS3** with strict adherence to cross-browser consistency.
- Connected client interactions smoothly to backend architectures using **JavaScript** and **TypeScript** for robust asynchronous operations.
- Leveraged advanced browser developer tools to isolate rendering anomalies, evaluate network payloads, and analyze client-side memory logs.
- Acquired sharp architectural insights into full Software Development Life Cycles (SDLC), providing a deep technical advantage for defect analysis.

FEATURED PROJECTS

Safe Railway – Railway Ticket Booking System

12/2025 – 02/2026

Automation & Performance QA Intern

Team Size: 7

- Tech Stack:** Java, Selenium WebDriver, TestNG, Apache JMeter, Git, GitHub
- Conducted rigorous end-to-end requirement mapping and automated major user interactions (Authentication, Train Queries, Seat Booking).
 - Engineered structured, highly reusable scripts with **POM design pattern** via **TestNG** for assertions and report capturing.
 - Constructed performance testing threads within **Apache JMeter** to analyze application response times, throughput parameters, and errors.
 - Maintained systematic repository version tracking using **Git/GitHub**, minimizing script redundancy and maintenance overhead.

Clothes Shop – E-Commerce Platform

03/2026 – 06/2026

Manual Tester Intern

Team Size: 7

- Activities:** Test Case Design, Functional/Exploratory/Regression Testing, Bug Tracking via Jira
- Designed exhaustive matrix test coverages detailing critical payment gateways and basket configurations from abstract user stories.
 - Executed deliberate exploratory testing to uncover subtle UI breaks and asynchronous race-condition states.

EDUCATION & PROFESSIONAL DEVELOPMENT

TON DUC THANG UNIVERSITY – Bachelor of Software Engineering | **GPA: 7.61 / 10**

- Certification: **Agile Development & Scrum Framework** (Issued by TDTU, 10/2023)
- English Language: **Aptis ESOL B1** (Fluent in reading/listening technical documentations)

CONTINUOUS ADVANCEMENTS & SELF-LEARNING

- Performance Testing:** Practicing multi-thread configuration setups in **Apache JMeter** to simulate concurrent user traffic and analyze system performance parameters.
- Python Automation:** Mastering basic syntax and structural properties to seamlessly port Java automation methodologies into Python-based frameworks (such as PyTest/Selenium).
- Next-Gen Frameworks:** Practicing automated web flows with **Playwright (TypeScript/JavaScript approach)**.
- CI/CD Integration:** Gaining practical knowledge with **GitHub Actions** to integrate smoke and automated regression tasks directly into software delivery pipelines.
