Nguyen Khanh Hoa

Software Tester (Intern/Fresher) | Manual & Automation Testing

Phone: 0702935541 **Email:** nguyenkhanhhoa3541@gmail.com **LinkedIn:** linkedin.com/in/nguyenkhanhhoa02
Gender: Female **Location:** Tan Binh District, HCMC, Vietnam

Professional Summary

Software Tester with 6 months of internship experience in **manual and automation testing** of web applications in Agile/Scrum teams. Designs test cases from requirements and user stories, performs functional, regression and exploratory testing, and manages defects through their full lifecycle in Jira. Hands-on with **Java, Selenium WebDriver, TestNG** (Page Object Model), plus basic **API testing** (Postman) and **load testing** (Apache JMeter). A prior ReactJS frontend internship supports root-cause analysis and clear bug communication with developers.

Objective: Fresher/Junior **QA Tester** or **QA Automation** role, or a QA/Software Tester **internship** if no fresher opening is available. Delivers assigned testing tasks reliably and learns new tools quickly (Selenium and JMeter during the internship, Playwright in progress), with a focus on deepening automation, API testing and CI/CD.

Technical Competencies

Test Design & Manual Testing	Requirement Analysis, Test Case Design, Test Data Preparation; Boundary Value Analysis, Equivalence Partitioning; Functional, Regression, Exploratory and Confirmation (Re-test) Testing; Bug Reporting. AI-assisted test case brainstorming, with all outputs reviewed and refined manually
Automation Testing	**Selenium WebDriver (Java)**, **TestNG**, Page Object Model (POM), automated regression suites. Learning: **Playwright**, Data-Driven & Hybrid frameworks
API, Performance & Database	**Postman** (API verification), **Apache JMeter** (basic load testing: response time and throughput under concurrent users), SQL (basic queries for data checks)
Programming Languages	**Java** (OOP, applied to test automation), **JavaScript / TypeScript** (basic), **Python** (basic scripting)
Tools & Process	**Jira**, **Git / GitHub**; Agile/Scrum, SDLC, STLC; CI/CD: basic **GitHub Actions** pipeline in personal projects

Work Experience

AGEST VIETNAM

03/2026 - 08/2026

Software Tester Intern

Ho Chi Minh City, Vietnam

- Analyzed requirements and user stories in review sessions with QA and dev teams; designed test cases and prepared test data.
- Executed manual test cases before each release; logged defects in **Jira** and followed them through fix, confirmation testing and regression testing of impacted areas.
- Maintained Selenium/Java scripts (Page Object Model), ran automated regression suites, and used **JMeter** for basic load testing of API response time under concurrent users.
- Participated in Scrum events: sprint planning, daily stand-ups, sprint reviews.

NAM PHUONG DIGITAL TECHNOLOGY 05/2025 - 10/2025

Frontend Developer Intern (ReactJS) Ho Chi Minh City, Vietnam

- Tested and debugged features and optimized frontend performance before each deployment, gaining hands-on understanding of the SDLC.
- Fixed UI bugs, including cross-browser compatibility issues, in collaboration with backend developers.
- Built responsive UI components with **ReactJS, HTML5, CSS3** and integrated them with RESTful APIs using JavaScript/TypeScript.

Featured Projects

Safe Railway - Railway Ticket Booking System 03/2026 - 05/2026

Role: Automation & Performance Tester Team Size: 7 | AGEST Internship

> **Tech Stack:** Java | Selenium WebDriver | TestNG | Apache JMeter | Git / GitHub
>
> **Code Repository:** github.com/NguyenKhanhHoa6235/Selenium-Agest-NguyenKhanhHoa-AGTT26.01.003

- Developed Selenium/Java automation scripts for core user flows (login, search, ticket booking) using the Page Object Model.
- Executed regression suites with TestNG; built JMeter load tests simulating concurrent users booking tickets to measure response time and throughput.
- **Outcome:** Reduced manual regression effort by automating core flows and identified a response-time bottleneck in the booking API under multi-user load.

Clothes Shop - E-Commerce Website 06/2026 - 08/2026

Role: Manual Tester Team Size: 7 | AGEST Internship

> **Activities:** Requirement Analysis | Test Case Design | Functional / Exploratory / Regression Testing | Bug Reporting (Jira)

- Designed test cases from user stories for cart management and checkout; performed exploratory testing on edge cases and boundary conditions.
- Reported bugs in Jira with clear reproduction steps, verified fixes by re-test, ran regression testing on related features, and took part in test case review sessions.
- **Outcome:** Found critical/high-severity bugs before release and identified cross-browser compatibility defects in business-critical flows.

Education & Certifications

TON DUC THANG UNIVERSITY - Bachelor of Software Engineering | **GPA: 7.61 / 10** | Graduated: **04/2026**

• Certification: **Agile Development & Scrum Framework** (10/2023)

• English: **Working proficiency** (CEFR B1, Aptis ESOL, 03/2024) - able to communicate with international colleagues on daily work and read technical documentation
