

NGUYEN KHANH HOA

SOFTWARE TESTER INTERN — MANUAL & AUTOMATION TESTING

Phone: 0923692870

Email: nguyenkhanhhoa1592@outlook.com

LinkedIn: [linkedin.com/in/nguyenkhanhhoa02](https://www.linkedin.com/in/nguyenkhanhhoa02)

Location: Tan Binh District, HCMC, Vietnam

PROFESSIONAL SUMMARY

Software Tester with internship experience in **Manual Testing**, **Automation Testing**, and basic Performance Testing for web applications. Hands-on experience in requirement analysis, test case design, test execution, and defect reporting within Agile Scrum environments.

Solid programming foundation in **Java**, applied to automation testing with **Selenium WebDriver** and **TestNG**, using the Page Object Model (POM) to improve maintainability of test scripts. Working knowledge of **JavaScript/TypeScript** from frontend development experience, and basic scripting ability in **Python**. Continuously building skills in test automation, performance evaluation, API testing, and CI/CD integration through self-learning and personal practice projects.

TECHNICAL COMPETENCIES

Automation Testing	Selenium WebDriver (Java) , TestNG framework, Page Object Model (POM) pattern, basic automation regression execution
AI-Assisted Testing	Uses AI tools to generate, optimize, and maintain test cases and improve testing efficiency
Programming Base	Java (Good working knowledge — OOP fundamentals, core syntax), JavaScript / TypeScript (Working knowledge — core concepts, DOM manipulation), Python (Basic scripting & syntax, self-learning)
Manual & Performance	Requirement Analysis, Test Case Design, Defect Logging, Functional / Smoke / Regression / Exploratory testing. Basic load and stress execution via Apache JMeter
API & Databases	Postman (Basic API verification), MySQL / PostgreSQL / SQL Server (Basic SQL queries for data verification)
Tools & Version Control	Jira (Issue & bug management), Git / GitHub (Version control)
Methodologies & CI/CD	Agile Scrum, SDLC / STLC processes, basic CI/CD awareness via GitHub Actions
Familiar With	Playwright, cross-browser testing concepts, data-driven testing concepts

WORK EXPERIENCE

AGEST VIETNAM

12/2025 – 06/2026

Software Tester Intern

Ho Chi Minh City, Vietnam

- Participated in requirement analysis sessions with QA and development teams to understand testing scope.
- Designed test cases based on functional requirements and user stories, and prepared test data for functional, regression, and basic performance testing.
- Executed manual test cases for web application features before release.
- Reported and tracked defects using internal tracking tools (**Jira**), and collaborated with developers to verify bug fixes through regression testing.
- Automation & Performance:** Supported creation and maintenance of Selenium automation scripts in Java following the Page Object Model structure; executed automated regression suites and conducted basic load tests with Apache JMeter to identify potential performance bottlenecks.
- Participated in Agile ceremonies including Sprint Planning, Daily Stand-up, and Sprint Review.

NAM PHUONG DIGITAL TECHNOLOGY

05/2025 – 10/2025

Frontend Developer Intern (ReactJS)

Ho Chi Minh City, Vietnam

- Developed responsive UI components using **ReactJS**, **HTML5**, and **CSS3**, and integrated frontend features with RESTful APIs using JavaScript / TypeScript.
- Fixed UI bugs and improved cross-browser compatibility.
- Collaborated with backend developers during feature development, and participated in testing, debugging, and client-side performance optimization before deployment.
- Gained practical understanding of SDLC, web ecosystems, and team-based software development.

FEATURED PROJECTS

Safe Railway – Railway Ticket Booking System

12/2025 – 02/2026

Automation & Performance QA Intern

Team Size: 7

- Tech Stack:** Java, Selenium WebDriver, TestNG, Apache JMeter (Basic Performance), Git / GitHub
- Developed automation test scripts using Selenium WebDriver with Java, covering core booking flows including Login, Search, and Booking.
 - Applied Page Object Model (POM) structure for organizing test code and improving reusability, and executed automated regression test cases using TestNG.
 - Set up basic load test threads in Apache JMeter to measure page response times during high-volume booking simulation.
 - Reported functional and performance defects with clear reproduction steps and environment logs, and maintained source code using Git and GitHub.
 - Outcome:** Reduced manual regression testing effort through Java automation coverage of core flows, and identified response time bottlenecks in the ticket checkout API under baseline multi-user load.

Clothes Shop – E-Commerce Website

03/2026 – 06/2026

Manual Tester Intern

Team Size: 7

- Activities:** Requirement Analysis, Test Case Design, Manual Functional / Exploratory / Regression Testing, Bug Reporting via Jira
- Analyzed requirements and created test cases based on user stories for core business features (Cart Management, Checkout Flow).
 - Performed exploratory testing to identify edge cases and unexpected system behaviors, and reported and tracked bugs with detailed reproduction steps.
 - Participated in test review sessions with team members, and verified bug fixes through regression testing.
 - Outcome:** Increased test coverage for critical user flows (Cart, Checkout), detected functional issues before release, and contributed to overall product stability and cross-browser responsiveness.

KEY STRENGTHS

- Strong analytical and logical thinking, with a detail-oriented mindset in functional and performance evaluation.
- Fast learner with strong self-learning ability, comfortable shifting across tech stacks.
- Good teamwork and communication in Agile environments, with strong interest in software quality and scalability through automation and performance monitoring.
- Good command of technical English (reading documentation, listening comprehension, and professional communication).

EDUCATION & CERTIFICATIONS

TON DUC THANG UNIVERSITY – Bachelor of Software Engineering | GPA: 7.61 / 10

- Certification: **Agile Development & Scrum Framework** (10/2023)
- English Language: **Aptis ESOL B1** (03/2024)

SELF LEARNING

- Advanced Java Automation:** Building Hybrid / Data-Driven test automation frameworks.
- Next-Gen Frameworks:** Practicing automated web flows with **Playwright** (TypeScript/JavaScript approach).
- Performance Testing:** Enhancing Apache JMeter scripting for concurrent user load simulation.
- API Testing:** Strengthening API testing fundamentals and automated API verification via Postman.
- Database Skills:** Practicing SQL for testing validation and database assertions.
- CI/CD Integration:** Gaining hands-on practice with **GitHub Actions** core concepts.
