

NGUYEN KHANH HOA

Automation Tester | QA Engineer

Phone: 0923692870

Email: nguyengkhanhhoa1592@outlook.com

LinkedIn: linkedin.com/in/nguyengkhanhhoa02

Location: Tan Binh, Ho Chi Minh City

Gender: Female

PROFESSIONAL SUMMARY

Automation Tester with **1+ year of professional testing experience** in software quality assurance, specializing in **Selenium WebDriver (Java)**, TestNG, and Page Object Model framework design.

Experienced in collaborating with software developers and QA teams to understand business requirements, design test scenarios, execute automated regression testing, and deliver reliable defect reports.

Backed by a software engineering background and hands-on development experience in ReactJS, with strong understanding of SDLC, Agile workflows, API testing, database validation, and CI/CD concepts.

Currently seeking an opportunity at **MiTek** to contribute to automation quality initiatives, improve testing efficiency, and continue growing as a professional QA Engineer in an international environment.

EDUCATION

Ton Duc Thang University

Bachelor of Software Engineering | 2020 – 2024 | GPA: 7.61 / 10

TECHNICAL SKILLS

Programming: Java, JavaScript, Python (Basic), C

Automation: Selenium WebDriver, TestNG, POM, Playwright

Tools: Git, GitHub, Jira, Postman, Figma

Database: SQL Server, PostgreSQL, MySQL

Process: Agile/Scrum, SDLC, STLC, CI/CD Concepts

Manual Testing: Test Case Design, Regression Testing, Defect Tracking

WORK EXPERIENCE

AGEST Vietnam — Software Tester

03/2025 – Present

- Collaborated with developers, business analysts, and QA members to understand product requirements and testing scope.
- Designed, developed, and maintained automation test scripts using Selenium WebDriver with Java and TestNG.
- Applied Page Object Model (POM) to improve test framework maintainability and reusability.
- Executed manual, functional, integration, and regression testing for web applications.
- Identified software defects, created clear bug reports, and tracked defect lifecycle until resolution.
- Validated backend responses through API testing using Postman and database verification with SQL.
- Participated in sprint planning, daily standups, sprint review, and release verification activities.

Nam Phuong Digital Technology — Frontend Developer

08/2024 – 02/2025

- Developed and maintained ReactJS user interfaces integrated with backend APIs.
- Improved understanding of application architecture, debugging, and software lifecycle.
- Worked with developers to identify UI defects and improve application stability.

PROJECTS

Safe Railway — Web Application Testing

Role: Automation Tester | Team Size: 1 | 01/2026 – 02/2026

Project Description

A web-based railway ticket booking system that allows users to search train schedules, book tickets, manage reservations, and process payments.

Tech Stack

Java, Selenium WebDriver, TestNG, IntelliJ, Git

Responsibilities

- Executed test cases to validate core features of the railway ticket booking web application.

- Developed automated test scripts using Selenium WebDriver with Java following Page Object Model (POM).
- Identified, analyzed, and reported software defects while tracking bug status during testing cycles.
- Applied Git for version control and maintained structured test code for better maintainability.
- Improved test efficiency by combining manual validation and automation regression testing.

Clothes Shop — E-Commerce Website

Role: Manual Tester | Team Size: 7 | 12/2025 – 01/2026

Project Description

A web-based clothing e-commerce system that allows users to browse products, add items to cart, and complete the checkout process.

Tech Stack

Excel, Google Sheets, Word, Google Docs

Responsibilities

- Analyzed requirements and created User Stories and Acceptance Criteria.
- Designed testing artifacts including Test Matrix, Test Checklist, and detailed Test Cases.
- Executed manual test cases for product browsing, cart management, and checkout process.
- Performed Ad-hoc Testing to identify unexpected issues and improve test coverage.
- Logged and managed defects with detailed reproduction steps.
- Conducted Bug Regression Testing to verify defect fixes.

CERTIFICATIONS

- Aptis ESOL English B1 — 03/2024
- Agile Development & Scrum Framework — 10/2023
