PROFESSIONAL SUMMARY

Detail-oriented Software Tester with over 1 year of experience in Manual and Automation testing, featuring a solid Software Engineering background. Proficient in designing robust test frameworks using Selenium WebDriver and Playwright. Expertise in bridging the gap between development and quality assurance by leveraging ReactJS knowledge to perform deep-dive technical testing. Committed to "Shift-Left" testing methodologies to deliver high-quality products in fast-paced Agile environments.

TECHNICAL SKILLS

Testing Methodologies: Functional, Regression, Integration, API Testing, Risk-based Testing, Agile/Scrum.

Technical Foundation: Java, JavaScript (ReactJS), HTML5, CSS3/SCSS, SQL (PostgreSQL, MySQL).

Automation Tools: Selenium WebDriver (Java), Playwright (JS/TS), TestNG, Page Object Model (POM).

Tools & Platforms: Git/GitHub, Jira, Postman, Figma, Docker, CI/CD (GitHub Actions basics).

WORK EXPERIENCE

AGEST VIETNAM

03/2025 – Present

Software Tester (Manual & Automation)

- Transformed manual test suites into scalable automation frameworks using Selenium WebDriver and TestNG, increasing regression efficiency by 40%.
- Collaborated directly with developers in Sprint Planning to define Acceptance Criteria and identify potential edge cases early in the design phase.
- Performed thorough API testing using Postman to ensure data integrity between microservices.
- Managed defect lifecycle using Jira, ensuring critical bugs were prioritized and resolved before major releases.

NAM PHUONG DIGITAL TECHNOLOGY

08/2024 – 02/2025

Frontend Developer (ReactJS)

- Developed responsive web interfaces and integrated RESTful APIs, providing a deep understanding of application state management and DOM structure.
- Debugging complex UI issues across different browsers, which sharpened the ability to identify the root cause of front-end defects.

- Advocated for unit testing and code reviews to maintain high-quality code standards within the development team.

KEY TESTING PROJECTS

E-Wallet & Payment Gateway (Mock Project)

02/2026 – 04/2026

Role: Senior QA Lead / Automation Engineer

Team Size: 5

- Developed an end-to-end automation suite for payment processing flows using Playwright, handling dynamic asynchronous transactions.
- Executed Security-focused testing to validate authorization headers and data encryption for sensitive user information.
- Simulated high-concurrency scenarios to monitor system behavior during peak transaction periods.

Tech Stack: Playwright, TypeScript, Postman, SQL, Docker.

Safe Railway - Booking System

01/2026 – 02/2026

Role: Automation Tester

Team Size: 1

- Built a Page Object Model (POM) framework from scratch to automate the booking and payment workflow.
- Maintained 95%+ test coverage for core business logic, reducing manual verification time significantly.
- Utilized Git for version control and integrated test reports for stakeholder transparency.

Tech Stack: Java, Selenium, TestNG, GitHub.

EDUCATION & CERTIFICATIONS

Ton Duc Thang University

2020 – 2024

Bachelor of Software Engineering (GPA: 7.61/10)

- **Certifications:** Aptis ESOL B1 (2024), Agile Development & Scrum Framework (2023).
