

NGUYEN KHANH HOA

SOFTWARE TESTER | MANUAL & AUTOMATION TESTING

Phone: +84 923 692 870 | Email: nguyenkhanhhoa1592@outlook.com | LinkedIn: [linkedin.com/in/nguyenkhanhhoa02](https://www.linkedin.com/in/nguyenkhanhhoa02) |
GitHub: github.com/NguyenKhanhHoa6235 | Location: Tan Binh District, HCMC, Vietnam

• PROFESSIONAL SUMMARY

Software Tester with hands-on internship experience in both **manual and automation testing** for web applications within Agile teams. Skilled at translating requirements and user stories into test cases that catch real defects, executing functional/regression/exploratory testing, and tracking issues through Jira from report to verified fix. A prior internship in frontend development (ReactJS) adds a practical understanding of how bugs originate in code — helping write sharper test cases and communicate issues more precisely with developers. Automation foundation in **Java**, **Selenium WebDriver**, and **TestNG** built on the **Page Object Model** for maintainable test suites, plus entry-level **API testing** (Postman) and **performance testing** (Apache JMeter). Actively growing toward a full-stack QA skill set — deepening automation, CI/CD, and API testing — with the goal of taking on a **Software Tester / QA Automation** role where testing depth and code awareness both matter.

• TECHNICAL COMPETENCIES

Automation Testing	Selenium WebDriver (Java) , TestNG framework, Page Object Model (POM) pattern, automated regression execution. Learning: Playwright , Hybrid/Data-Driven Java frameworks
Programming Base	Java (good working knowledge - OOP fundamentals, applied to test automation), JavaScript / TypeScript (working knowledge - DOM manipulation), Python (basic scripting)
Manual Testing & Test Design	Requirement Analysis, Test Case Design, Test Data Preparation, Test Design Techniques (Boundary Value Analysis, Equivalence Partitioning), Defect Reporting & Verification (confirmation testing), Functional / Regression / Exploratory testing. Uses AI assistants to draft test case ideas, then reviews and refines them manually
Performance Testing	Apache JMeter - entry-level load testing (API response time and throughput under concurrent users)
API & Databases	Postman (fundamental API verification), SQL (basic queries for data verification)
Tools & Version Control	Jira (issue & bug tracking), Git / GitHub (version control)
Process & CI/CD	Process: Agile Scrum, SDLC / STLC. CI/CD: entry-level pipeline setup with GitHub Actions , applied in personal practice projects

• WORK EXPERIENCE

AGEST VIETNAM

12/2025 - 06/2026

Software Tester Intern

Ho Chi Minh City, Vietnam

- Participated in requirement review sessions with QA and dev teams, analyzed functional requirements and user stories to identify testable conditions, then wrote test cases and prepared test data.
- Executed manual test cases across web application features before each release, logging defects in **Jira** and tracking them through developer fix, confirmation testing (re-test), and regression testing on impacted areas.
- Maintained the team's Selenium/Java scripts under the Page Object Model, ran automated regression suites, and used JMeter for basic load testing to measure API response time under concurrent users and surface performance bottlenecks early.
- Participated in regular Agile ceremonies: sprint planning, daily stand-ups, sprint reviews.

NAM PHUONG DIGITAL TECHNOLOGY

05/2025 - 10/2025

Frontend Developer Intern (ReactJS)

Ho Chi Minh City, Vietnam

- Took part in testing, debugging, and client-side performance tuning before each deployment, which built an understanding of the SDLC and first drew focus toward QA.
- Tracked down and fixed UI bugs, including cross-browser compatibility issues, working alongside backend developers throughout feature development.
- Built responsive UI components with **ReactJS**, **HTML5**, and **CSS3**, and connected frontend features to RESTful APIs using JavaScript/TypeScript - experience that now informs how bugs are traced back to root cause during testing.

• FEATURED PROJECTS

Safe Railway - Railway Ticket Booking System

12/2025 - 02/2026

Role: Automation & Performance Tester

Team Size: 7 | AGEST Internship

Tech Stack: [Java](#) [Selenium WebDriver](#) [TestNG](#) [Apache JMeter](#) [Git / GitHub](#)

Code Repository: github.com/NguyenKhanhHoa6235/Selenium-Agest-NguyenKhanhHoa-AGTT26.01.003

- Wrote Selenium/Java scripts covering the core user flows (login, search, booking), structured with the Page Object Model for maintainability.
- Ran automated regression tests with TestNG, and set up JMeter load tests to measure API response time and throughput under concurrent users simulating high-volume booking.
- Outcome:** Reduced manual regression effort by automating core flows, and identified a response-time bottleneck in the booking API under multi-user load.

Clothes Shop - E-Commerce Website

03/2026 - 06/2026

Role: Manual Tester

Team Size: 7 | AGEST Internship

Activities: [Requirement Analysis](#) [Test Case Design](#) [Functional / Exploratory / Regression Testing \(Manual\)](#) [Bug Reporting via Jira](#)

- Derived test cases from user stories covering cart management and checkout, and ran exploratory testing to explore edge cases and boundary conditions.
- Reported bugs with clear reproduction steps, verified fixes by re-test and ran regression testing on related features, and joined test review sessions with the team.
- Outcome:** Improved coverage on the most business-critical flows, found critical/high-severity bugs before release, and identified cross-browser compatibility defects.

• **KEY STRENGTHS**

- Genuinely curious about the "why" behind a bug, not just the "what" - strong analytical thinking, detail-oriented on functional and performance testing.
- Picks up new tools and stacks quickly, comfortable being the newest person on unfamiliar tech.
- Works well in Agile teams, communicates clearly with both QA and developers, and cares about product quality over just checking test cases off a list.
- Comfortable reading technical documentation and communicating in English.

• **EDUCATION & CERTIFICATIONS**

TON DUC THANG UNIVERSITY - Bachelor of Software Engineering | **GPA: 7.61 / 10** | Graduated: **04/2026**

- Certification: **Agile Development & Scrum Framework** (10/2023)
- English Language: **Aptis ESOL B1** (03/2024) - intermediate speaking, strong reading & listening comprehension, comfortable with technical documentation
